ABOUT ME

As a web developer, I specialize in problem-solving, utilizing my skills in Typescript, React, Next.js, and Node to develop comprehensive solutions.

My top priorities include code optimization, readability, and productivity.

The process of software development presents me with the ultimate satisfaction, as it enables me to continuously learn, enhance my skills and knowledge, and overcome obstacles.

SKILLS & TECHS

- TypeScript
- React
- Node
- Next.js
- Firebase
- SQL
- NoSQL
- Jotai
- Zustand
- Redux
- Recoil
- Tailwind
- RESTful APIs
- Git
- GitHub
- Functional Programming (FP)
- Object-Oriented Programming (OOP)
- Google Cloud Platform (GCP)
- Vercel

GUSTAVO SOUZA

SOFTWARE ENGINEER

WORK EXPERIENCE

PROJECT MANAGEMENT INTERN

Timenow | July 2018-October 2019

- Provided support to two senior analysts in overseeing the management of the company's two most significant contracts, which involved over 700 employees.
- Devised and refined processes to streamline financial and personnel control, utilizing Google Script, JavaScript, and Python to achieve optimal results.

IT ANALYST

Timenow | October 2019-January 2021

- Held the responsibility of overseeing all the company's systems.
- Managed the SQL database of the organization.
- Developed comprehensive dashboards for managing finances, HR, and other relevant departments. The tools utilized included Power BI, Python, and API integration using JavaScript, DAX, M, R, SQL.
- Developed automation procedures to expedite processes in all departments.
- Garnered recognition as an organizational reference for delivering solutions and problem-solving.

DATA ANALYST

Bbutton Ventures | February 2021-December 2021

- Constructed the internal SQL database architecture of the company utilizing data from a proprietary delivery application.
- Produced interactive dashboards using a variety of tools such as Power BI, Python, DAX, M, R, and SQL. The dashboards provided valuable insights for the organization and aided in crucial decision-making.
- Ensured optimal performance by maintaining the database for several months and adapting it to meet application modifications as necessary.

FULL STACK DEVELOPER

Top Seller | Jan 2021-present

- Spearheaded the development of an e-commerce management system.
- Collaborated with a team of two developers to build the entire application from scratch.
- Integrated multiple marketplace APIs utilizing Typescript.
- Constructed a live sales feed, which includes real-time profit, revenue, and margin calculations utilizing React, Typescript, Firebase, Node.JS, and PostgreSQL.
- Developed a robust warehouse management system (WMS).
- Deployed the application in GCP leveraging industry-standard DevOps practices.
- Continuously improving the application on a daily basis.

EDUCATION

UNIVERSIDADE FEDERAL DO ESPÍRITO SANTO (UFES)

Computer Engineering - Jan. 2016 - Dec.2018

Business - Dec. 2019 - current
